

# SupaSnooker

## SupaSnooker Slot Game

Imagine a slot-style game that **looks** and **plays** out like a real snooker match. Add jackpots and interactive bonus rounds as you clear the table in order. Consider a progressive side-wager that **pays you** for missed shots.

**SupaSnooker** is simply one of the most innovative casino products on the market today. Tailored to a wide audience that loves both sports and wagering, this game is an operator's marketing dream.

Built using the flexible **BaddaGaming** slots engine, SupaSnooker plays off of a triangular reel where each 'spin' is a shot that splits and regroupes the available balls.

## How does it play?

The object of the game is to score by 'potting' object balls in a predefined order. Sink a consecutive red and colour according to the payout patterns and score big! All balls have the same value as snooker, but those values act as multipliers for pattern wins. Potted colours are re-spotted, and players are free to concede frames and start again, just like a real match!

Designed to the highest graphic and animation standards using rendered 3D images, **SupaSnooker** keeps players engaged with **lightning-fast cue action** combined with **high win-rates**.

Further entertainment is provided by our animated referee, who comically comments on performance, big wins and shots, as well as initiating and allocating the **"Gentleman's Wager"** feature.

The **"Gentleman's Wager"** is an accumulator that rewards players for every shot they miss by allocating a fixed percentage of the wager to a side-purse. The purse only pays out in the **Bonus Game** and is a superb incentive for players to continue playing to clear the table, rather than concede!

The interactive **Bonus Game** is reached once all available reds are sunk. The player must then choose a pocket to sequentially pot the remaining colours and collect the accumulated multipliers!

The slot can be configured for multi-lingual, multi-currency game play. All game sounds and background music have been specially scored.

## The BaddaGaming advantage

- **Portability** – vector format allows porting to iTV/Mobile/Kiosk
- **X-Platform** – platform neutrality allows for easy integration
- **Demographics** – games appeal across customer base
- **Quality** – focus on genuine artistry & attractive animation
- **Gameplay** – interactive environments & immersive storylines
- **'Brandability'** – optimises brands by reflecting high values
- **Rewards** –jackpot features & special 'side-wager'
- **Wins** – high hit rates & win opportunities
- **Sonics** – game sounds scored professionally
